SUMMARY

I am a fourth year Informatics Engineering student at Hasanuddin University. I was responsible for Web Development specialize on back-end development which is related to solving the problem in terms of business logic to deliver the best system functionality. I have experience working with **PHP Laravel** and also make **Rest-API**. I also have an interest in **mobile development** by taking part in the **Bangkit program 2021**. And then last but not least i also have a good communication and love to work as a team.
